

EWB-UMN General Chapter Meeting- 11/07/07

We had a great turnout for our last chapter meeting. It was great to see all the new faces and how quickly people have started to pull things together.

Initiation of two new projects took place at the meeting: The Haiti Water Sachet Project and Haiti Indoor Sanitation System.

Upcoming team meetings for those and other projects were discussed and can be found here.

Criteria and expectations for EWB student members was also discussed

Brian spoke in general of EWB and its objectives and Eric and Nate spoke about something too.

After formalities were covered the meeting broke with members migrating to individual project groups and what was left of the pizza.
